

Chemistry Graduate Student Association (CGSA) Funding Requirements (2021-2022)

Bylaw Requirements:

- Attend all General Body Meetings (at least 2 per semester)
- Participate in 2/3 of all CGSA activities

2021-2022 Trial Requirements:

Instead of requiring a 2/3 participation from members, we are conducting a trial in which funding is given based on the percentage of participation of the individual. So, if an individual only makes it to 50% of the CGSA activities, then they will be eligible for 50% of the total funding available to them.

For example, a second-year student has the ability to request up to \$200 in funding. If that individual only participated in 33% of the CGSA activities the max they could get would be \$66. A fifth-year student has the ability to request \$500 in funding. If that individual participated in 50% of the CGSA activities the max they could get would be \$250.

When applying for funding please include:

- Proof of 2 additional forms funding
- What year you are in the department
- The filled out funding application

If there are any questions regarding this, please email the CGSA officers at

cgsa@chemistry.msstate.edu
